

Important Safety Tips Concerning Natural Gas

If you smell gas, even if you are not a natural gas customer of the City's, please call 706-485-0195 to report a possible gas leak.

Always remember to call before you dig. In some areas our underground utility lines are not as deep as in other areas. Telephone, electric and television cables may also be buried in places that you are not aware of as well. For Safety Sake, please call the local utility companies to check for possible underground lines before digging. **The number for the Utility Locate Service is 1-800-282-7411.**
